SUMMARY

React Native engineer with 5+ years of experience building, modernizing, and maintaining production iOS and Android applications. Led a 2-person team and owned two healthcare applications end to end, delivering engineering-initiated improvements and features based on product-manager-authored functional requirement documents (FRDs). Experience spans React Native upgrades, application architecture, performance optimization, production troubleshooting, CI/CD automation, and AI feature integration across healthcare, property management, sports, and media.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, HTML, CSS
Mobile & UI	React Native, Expo, React Navigation, Reanimated, Unistyles, NativeWind
State & storage	MobX, Context API, AsyncStorage
APIs	REST APIs, Firebase Authentication, Firestore, Realtime Database, push notifications
Performance	Hermes, FlashList, RecyclerListView
Testing	Jest, Detox, React Native Testing Library
Delivery	Git, GitHub Actions, Fastlane, EAS Build, EAS Submit, OTA updates, TestFlight, App Store and Google Play releases
AI coding tools	Claude Code, Codex, ChatGPT, GitHub Copilot; codebase analysis, implementation, debugging, and refactoring with review and testing

EXPERIENCE

Dec 2025 – Oct 2026

Team Lead — Research and Development

Bizmatics: A Harris Computer Company · Full-time

- Led a 2-person team and owned two production React Native healthcare applications, PrognoCIS and My Health Records, end to end across feature delivery, maintenance, and production support.
- Owned the full delivery cycle for engineering-initiated improvements and product features defined in PM-authored FRDs, from requirements analysis and technical implementation through testing and release.
- Integrated an AI-personalized dashboard through an internal tool backed by OpenAI, surfacing important information tailored to each user's needs.
- Integrated a documentation-backed application chatbot through the internal tool to answer user questions about features, navigation, and application usage.
- Led React Native upgrades across both applications, resolving dependency and ecosystem compatibility issues.
- Improved application architecture and code organization; introduced React Native Unistyles for consistent, maintainable styling.
- Strengthened error handling and diagnostic visibility to investigate production issues and resolve client-reported problems.
- Designed and integrated CI/CD automation for Android and iOS builds, reducing repetitive manual release work.
- Integrated live chat to support communication between doctors and patients.

Jul 2022 – Oct 2025

React Native Developer

Catalyst Media Integrated

- Developed and maintained three production React Native applications: Huna Properties, DREC E-Services, and Jebel Ali Racecourse.
- Built Huna Properties features for maintenance payments, visitor management, and real-time push notifications.
- Delivered DREC E-Services workflows for document uploads, service requests, and payment-gateway integration; developed Jebel Ali Racecourse features for live racing updates, results, and fixture scheduling.
- Optimized application loading through code splitting and Hermes JavaScript engine optimization.
- Integrated payment processing, Firebase Authentication, and biometric login; implemented push notifications for critical updates and communications.
- Established automated deployment pipelines using GitHub Actions and Expo EAS, reducing manual deployment steps.
- Collaborated with design and backend teams to deliver production features.

Jun 2021 – Jun 2022

Software Developer

Tekno Point

- Developed React Native screens and reusable UI components for HireStar; implemented MobX for application state and data flow.
- Integrated Firebase authentication, real-time database synchronization, and cloud storage.
- Built image uploads, post sharing, and embedded web views for social networking features.
- Improved responsiveness through React component optimization and lazy loading.

SELECTED APPLICATIONS

PrognoCIS – Healthcare application. App Store Google Play

My Health Records – Patient portal and health-record application. App Store Google Play

Huna Properties – Society-management application. App Store Google Play

DREC E-Services – Property-management application. App Store Google Play

Jebel Ali Racecourse – Racing updates, results, and fixtures. App Store Google Play

Bingepods – Podcast-streaming application with offline playback and audio processing.

EDUCATION

2018 – 2021

Bachelor of Science in Information Technology

University of Mumbai

LANGUAGES

English (Professional Working Proficiency) · Hindi (Native) · Urdu (Native)
